

NEW HOLLAND PRECISION LAND MANAGEMENT A NEW LEVEL OF CONNECTIVITY AND PRODUCTIVITY.

With PLM Intelligence™, New Holland is unlocking a new level of connectivity and remote viewing never before seen in a 4-wheeldrive tractor. With these platforms, with a 3-year Advanced Telematics standard on all new T8 & T9 models, producers can expect real-time connectivity to their New Holland dealer, improved profitability through remote software updates, diagnostics and data integration, and increased machine operating time. They can also expect the industry's best in guidance, an easier operator interface, and improved decision-making capability from data analytics.

MYNEWHOLLAND portal provides a single gateway to a world of New Holland services to enhance customers' productivity. Get all the functionality wherever you are, whenever you need it. You can register your equipment, link it to your dealer in less than one minute, and discover offers, video and manuals related to your fleet.

MYPLMCONNECT

MYPLM Connect gives you fleet and farm management capabilities that will enhance your daily work in the field. It will bring several benefits including:

FARM MANAGEMENT

It is important to clearly understand your performance in the field. This is why **MYPLM Connect** includes a dedicated Farm tab where you can upload and view upcoming tasks/completed jobs.

FLEET MANAGEMENT

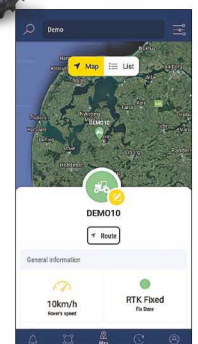

Always having a clear picture about what's happening to machines whilst working is a key factor in keeping everything under control: with **MYPLM Connect**, you can monitor your fleet easily on any device (pc/tablet/phone), increasing operating time.

DATA MANAGEMENT

In today's world, being connected with others is extremely important. That's why in **MYPLM Connect**, users can easily share data from the office with trusted partners and operators in the field. A complete reporting system is available as well, to support next steps and decisions.

PLM™ RTK+

DON'T CHOOSE BETWEEN SPEED, RELIABILITY OR COVERAGE: With **PLM RTK+** you can access quick convergence, large coverage and reliable performance. Linking to South Africa's leading cellular correction network, you can choose tremendous precision that ensures you 2.5 cm pass-to-pass and year-after-year accuracy anywhere in your fields. **PLM RTK+** will also now be standard on all new T8 & T9's for 3 years.

Contact your nearest New Holland dealer for information on all your New Holland product needs.
